# AGV sensor Magnets

## SECTOR OF APPLICATION

- > Handling and manipulation of loads
- > Logistics
- > companies with automated warehouses
- > Industry & Automation

## PRODUCT

“FLEX MAG” bands, stripes and rolls of magnetic strips.

## APPLICATION

FLEX MAG: magnetic stripes and rolls to realize itinerary for your AGV.

MAGNETIC STRIPE has one adhesive-taped side, that grant strong fixing to the floor; the other side is axial magnetized. it allows to AGV machine to follow the itinerary created.

The stripe is very easy to be applied. It allows creation of curves, or allows creation of new itineraries, and chance to modify the route.

Applying on the magnetic stripe colored bands, you can give to AGV different tasks, like stop, and change direction.

Different colors will allow AGV machine to move autonomously, saw that each color correspond to a specific order.

## ADVANTAGES OF OUR AGV SENSORS MAGNETS:

1. Our magnetic stripe is fast and easy to apply
2. You can create the route you want, curves included
3. It is easy change the route
4. Chance to give to AGV machine orders, thanks to the colored magnetic stripes.
5. Fast delivery, only 2-3 weeks
6. We create the shape that you want
