

# THE MAGNETS

## INSIDE THE PASSENGER CAR

### MAGNETS APPLICATIONS

## MAGNETIC CLOSURE FEATURES

### COMPACT and DESCREET:

the possible forms, small and compact, allow easy positioning.

### ADAPTABLE:

Those magnets allow a good fixing on every kind of support. Starting from customer's requests, we can suggest you so many shapes studied just for you!

### AESTHETIC:

Compact and invisible.

### SILENT:

The plastic shell dampens the vibrations giving an "soft touch" effect.

### EASY TO INSTALL:

studying with the customer the desired shape of the magnet , we are confident to offer you the perfect fit with your plastics or metal supports.

### RELIABLE:

The permanent magnets guarantee a constant holding force day by day.

### QUALITY:

The **CALAMITA line** magnets are realizable by neodymium, ferrite, alnico or samarium, depending on the final application.
