

Measuring instruments Utile per davvero (Really useful)

PROFESSIONAL MAGNETIC FIELD VIEWER PRO 3500 model

Apply PRO 3500 magnetic paper to the magnet. The layout of the magnetic field is displayed very clearly on the green viewer. The clarity of the reading depends on the value of the magnetic flux on the object: higher the intensity of the magnetic flux, better the display of the magnetic field on the green viewer.

APPLICATIONS

- Measurement of magnetic fields
- Test coil
- Post magnetisation polarity checks
- Assembly of magnets in electric motors
- Installation of magnetic locking system blocks
- Fastening system check
- Multi-pole quality control
- Magnetotherapy tester
- Wellness tester
